Eetclub!

Taylor Swift, Kygo, Lauv,
Avicii, James Arthur

Album Category Component

Input (props):

- Title: String
- albums: Array

The screenshot shows a mobile application interface with a dark theme. At the top, there are three cards: "Shimmering Strings" (with a piano icon), "Discover Weekly", and "Top Hits NL". Below this is a large red-bordered box containing the title "Fijne muziek voor deze donderdag!" and "Album Component". Inside this box are three cards: "Top Hits NL" featuring J Balvin, "Eetclub!" featuring a group of people at a dinner table, and another "Top Hits NL" card featuring J Balvin. Below these is a "Made For You" section with a partial track preview for "Gabriel Fauré".

Play Song

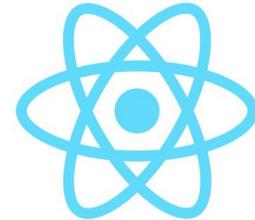

```
expo install expo-av
```

- Play the sound
- Pause/play button
- Display the progress of the song

Setup AWS Amplify

React Native

+

AWS Amplify

Prerequisites:

- AWS account (Free)
- Amplify CLI Installed and configured

Getting started guide: <https://docs.amplify.aws/start>

API and Database

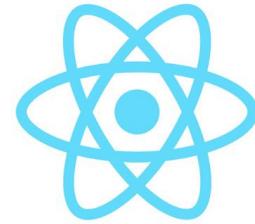

- GraphQL API
- Models:

- AlbumCategory
 - Id
 - Title
 - Albums

- Album
 - Id
 - Name
 - By
 - numberOfLikes
 - imageUri
 - artistsHeadline
 - Songs

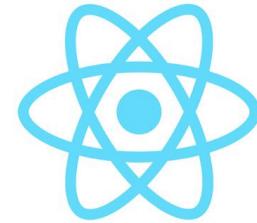

React Native

AWS Amplify

Dynamic Player Widget

- Play the song that we select
- Define the AppContext
- Provide the values for the Context
- Consume the values in order to write and read the context

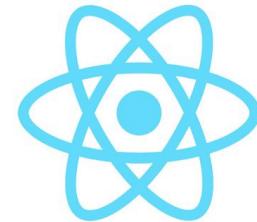

React Native

AWS Amplify

Authentication

- Add Amplify Auth

React Native

+
